

19a Conferenza Sicurezza Prodotti ***Il futuro della chimica in Europa:***

dagli indirizzi politici alle implicazioni per le aziende

***Il punto di vista delle Autorità italiane
sulle strategie europee***

Azioni di coinvolgimento

Mariano Alessi, Ministero della Salute

Elementi e strumenti indicati dalla COMMISSIONE

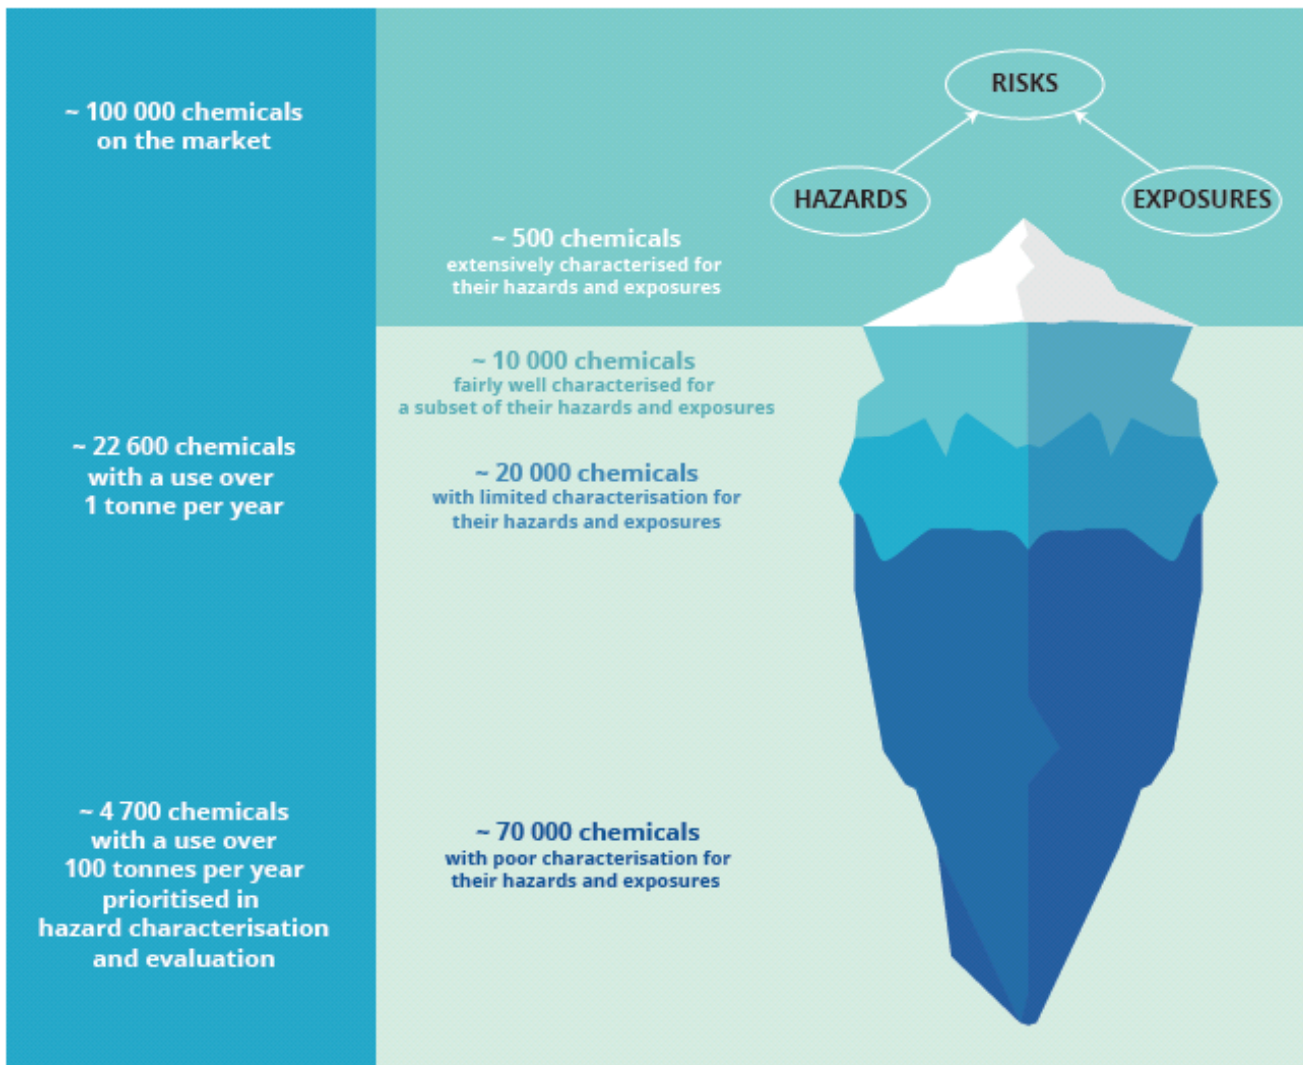

Comunicazione COM(2020) 667 final

Chemicals Strategy for Sustainability Towards a Toxic-Free Environment

the Green Deal and the digital transitions of our economy and society

- **SAFE AND SUSTAINABLE-BY-DESIGN**
- **NON-TOXIC MATERIAL CYCLES**
- **INNOVATING INDUSTRIAL PRODUCTION**
- **STRENGTHENING EU'S OPEN STRATEGIC AUTONOMY - VALUE CHAINS -**
- **PROTECTION AGAINST MOST HARMFUL CHEMICALS**
- **CHEMICAL POLLUTION IN NATURAL ENVIRONMENT**
- **COORDINATE AND SIMPLIFY ACTIONS ACROSS EU CHEMICAL LEGISLATION**
- **METHODOLOGIES AND DATA**
- **ZERO TOLERANCE FOR NON-COMPLIANCE**
- **INFORMATION REQUIREMENTS**
- **SCIENCE-POLICY INTERFACE**
- **INTERNATIONAL LEADERSHIP**
- **COOPERATION WITH THIRD COUNTRIES**

The unknown territory of chemical risks, EEA Agency

L'ECHA e le tre Istituzioni legiferanti

This view of ECHA's tasks fits into the construct of the three legislative institutions: the Commission, as the guardian of the EU Treaties and proposer of legislation, the European Council and the European Parliament deciding and Member States enforcing. The agencies' role is in-between the Member States and the three institutions, serving the EU based on the input from Member States.

Integrated Regulatory Strategy (IRS) 2020 towards 2027 goals

Since 2013, the SVHC Roadmap followed by ECHA's Integrated Regulatory Strategy have provided a coherent basis for a close collaboration among ECHA, Member States and the European Commission to achieve the aims of REACH and CLP. The implementation of these strategies also contributes to reaching the United Nation's 2030 Sustainable Development Goals concerning chemicals.

Integrated Regulatory Strategy (IRS) 2020 towards 2027 goals

The Integrated Regulatory Strategy provides an effective means of identifying substances which either need additional EU risk management or are sufficiently risk managed. This contribution to the three institutions' implementation of the legislation helps ensure a high level of protection and the smooth functioning of the EU internal market.

Integrated Regulatory Strategy (IRS) 2020 towards 2027 goals

- **Accelerate data generation**
- **Intensify identification (grouped of substances of concerns – e.g. Petroleum and Coal; Phtalates and Bisphenol; MISA - metal and inorganics sectoral approaches)**
- **Accelerate regulatory actions**
- **Ensure appropriate intervention by authorities and industry,**
- **Meet information requirements among stakeholders an registrants**
- **Improve comunication on safe use in the supply chain**

Ringrazio

***CHIMICA E FUTURO SOSTENIBILE
RICHIEDONO IL CONTRIBUTO DI TUTTI***
