**Moving
Goods from
Road to
Intermodal,
not an easy
task !**

19/06/2018

Our target our Constrains

- Move our Deliveries from North Italian Plants to our Company based in Onda, Spain to Intermodal ;
- Full Truck Lorries, 3 to 4 days per week;
- €/ton must not increase;
- Service to Customer can only improve (transit time, reliability).

Our difficulties

- Local vs European rules for lorry maximum weight : it has been very difficult to have precise information about Spanish requirements to allow 44 tons intermodal shipments
- First shipment : a disaster, two days late, due to port congestion

And now ?

Waiting a green light by our Forwarder to organize a second shipment, with good possibilities to respect agreed transit times.
